EDUCATION

The Ohio State University

Expected Graduation May 2027

BS in Electrical & Computer Engineering. Minor in Japanese

Columbus, OH

- GPA: 3.962

- Involved in Athletic Band, Frassati Mountaineers, Tau Beta Pi, Longboarding Club, OHI/O Makeathon

Rotary Youth Exchange

August 2022 - July 2023

- Full cultural immersion living in Japan for a year with a Japanese host family and attending a Japanese High School in Nasushiobara, Japan. Learned Japanese and experienced many aspects of the culture.

Wooster High School

Graduation May 2022

GPA: 3.884

Wooster, OH

- Involved in Speech and Debate, Soccer, Marching Band, Drama Club, Tennis, and Academic Challenge.

WORK EXPERIENCE

Integrated Solutions For Systems

May 2026 - August 2026

Engineering intern

- Assisting with development of PNTOS, an open-source system designed to build and fuse position, navigation, and timing sensor applications.

OSU Electrosience Laboratory

Feb 2026 - Present

Research Assistant - Wearable and Implantable Technologies Group

- Assisting with research in applications of antennas for medical research.
- Applying adaptive filtering to a wearable device using magnetic fields to detect heartbeats as a means to estimate cognitive workload.

FirstEnergy

June 2025 - May 2026

Fiber Networks Intern

- Assisted in planning Fiber Network projects and integrating them into the power grid.

OSU College of Optometry

August 2024 - Present

Research Assistant

- Used C#, Unity, and SteamVR to assist the College of Optometry research by making VR simulations using eye tracking capabilities in VR headset to test and analyze patient performance.
- Used Python to create and analyze data sets with thousands of points about patient performance.
- Developed a full stack application that uses Javascript and Python to remotely control multiple Arduino devices over bluetooth.

OSU Department of Electrical and Computer Engineering

January 2025 - May 2025

Lab Monitor for ECE 2060 Digital Logic

- Helped students in the laboratory section of the course use FPGA software to design digital logic programs.

SKILLS

Java, C++, Python, C#, Matlab, Autodesk Inventor, Excel, Word, Powerpoint, Power Automate

Japanese Language (JLPT N2 certified)

Problem solving, Working with diverse groups, Communication, Creativity, Public Speaking

Github Projects: <https://github.com/HaydenMichel8?tab=repositories>

AWARDS/DISTINCTIONS

Eagle Scout, May 2022 - Installed boardwalks at local hiking trails as an Eagle service project.

Selected for the First Year Fundamentals of Engineering Showcase for software design project final.

National Merit Finalist
